

iRegen® is shown to be successful in treating dry eyes.

Our iRegen® medical research team has developed sterile eye drops for dry eyes. More than a lubricant, this new technology can be used for the relief of burning, redness and general ocular discomfort resulting from dryness of the eyes.

iRegen® stimulates the body's natural healing power to bring soothing relief from a variety of environmental and medical factors causing dry eyes. iRegen® is a safe and sterile solution that is fully compliant with FDA regulations.

iRegen® contains cytokines and growth factors such as VEGF, TGFβ1, TGFβ3, EGF, HC-HA/PTX-C.PTX-3 (Pentraxin 3) and GDF11 that can promote healing and lubrication.

NEXT GENERATION: Sterile Ophthalmic Solution
